First Destinations Executive Summary
2017-2018 Master's Graduates

Methodology

The First Destinations report provides placement information on students who graduated during the 2017-18 academic year. Graduates must be employed, serving in the military, serving in a volunteer or service program, or enrolled by Dec. 31, 2018 in order to count as successfully placed.

First Destinations data are based on variety of data sources, including online surveys, phone surveys, national databases, data from Miami University offices, direct employer confirmation, and public sources. Full details on the methodology are available in Appendix C.

Placement results are based on graduates' primary activity after graduation and align with National Association of Colleges and Employers (NACE) First Destination guidelines. National comparison data will be available from NACE in October.

Results

Data were obtained for 513 graduates out of 744 total (69.0% knowledge rate).

The overall success rate for the graduating class is 98.2%, compared to 97.6% last year.

- According to NACE, nationally 89.0% of the previous year's master's degree graduates (2016-17) were successfully placed.
- Comparison data for the current graduating class will be available from NACE in October.

76.2% of the graduating class are employed full-time, with an average salary of $53,444.

Among those who are employed (full-time or part-time):

- 90.7% are employed in their field of study.
- 71.7% worked for their employer previously.
- 17.6% are employed at a college or university.
- 94.1% are employed in a position that requires a college degree, although only 29.1% are employed in a position that requires a master's degree or higher.

13.8% of graduates are pursuing additional education in graduate or professional school.

47.3% of graduates live in Ohio while 49.3% live in a different U.S. state. The remaining students live in either an American territory (0.2%) or a foreign country (3.2%).

Footnotes

[1] The "knowledge rate" indicates the percentage of the graduating class for whom we have placement data.

[2] The overall success rate identifies the total percentage of alumni who are employed, engaged in military service, engaged in a volunteer/service program, or who are continuing education. Consistent with the National Association of Colleges and Employers (NACE) First Destination guidelines, the success rate calculation excludes alumni who are not seeking employment or education from the denominator. However, alumni who are not seeking employment or education are included when calculating the individual primary activities (e.g., percent employed, percent continuing education).

[3] Results marked "---" are not available because the response size was too small to be identified in reporting ($n < 10$).

[4] Salary data reported by NACE are based solely on alumni whose primary activity is classified as "Standard Employment FT." This field should be used for NACE comparisons. Alumni who are employed in other full-time positions (e.g., entrepreneur FT, faculty FT) are excluded from NACE salary reporting.

[5] Because participants were allowed to select more than one option, responses may total more than 100%.

Appendix C: Methodology

For the 2017-18 graduates, students must be employed, serving in the military, serving in a volunteer or service program, or enrolled by Dec. 31, 2018 in order to count as successfully placed.

First Destinations data are based on variety of data sources, including online surveys, phone surveys, national databases, data from Miami University offices, direct employer confirmation, and public sources. When multiple data sources are available, data that are self-reported by the graduate after graduation (i.e., online and phone surveys of alumni) are prioritized.

Data Sources

New Alumni Online Survey

An online survey of alumni, conducted by the Office of Institutional Research & Effectiveness and administered September - December (after the end of the academic year).

New Alumni Phone Survey

A phone survey of alumni, conducted by the Office of Institutional Research & Effectiveness and administered October - December (after the end of the academic year).

Banner

Data on graduates who are employed at Miami after graduation or who continue their enrollment at Miami (after completing a degree) are based on data available in the Banner data system.

Optional Practical Training (OPT)

The Office of International Students and Scholar Services maintains employment information on international graduates who participate in Optional Practical Training (OPT). The OPT program allows individuals who are in the U.S. on a student visa to work after graduation for a limited period of time.

National Student Clearinghouse

The National Student Clearinghouse (NSC) maintains student enrollment records for students enrolled at more than 3,600 colleges and universities, representing 98% of all students in public and private U.S. institutions. NSC records are used to identify graduates who are continuing their education after graduation.

OIR Graduation Survey

A online survey of graduating students (undergraduate and graduate), conducted by the Office of Institutional Research & Effectiveness. The Graduation Survey is administered each term to students shortly prior to graduation.

Farmer School of Business (FSB) Graduation Survey

A survey of graduating FSB students (undergraduate and graduate), administered by the Farmer School of Business.

College of Engineering and Computing (CEC) Graduation Survey

A survey of graduating CEC students (undergraduate only), administered by the College of Engineering and Computing.

Center for Career Exploration and Success

A small number of employers provide hiring and salary data directly to the Center for Career Exploration and Success.

LinkedIn

Public profiles of graduates are used to identify basic placement information, including job-seeking status, position titles, employer names, and enrollments. LinkedIn profiles are used only if all other data sources failed to provide data.
