

Oxford Campus Success Rates* Full-Time Undergraduate Transfer Students (2013 Cohort)

*Success rates reflect the number of bachelor's degree-seeking undergraduates who, after 6 years, have graduated with a degree or certificate or are still enrolled at an institution of higher learning, regardless of whether the degree/enrollment is at Miami University or another college or university.

Beginning with the fall 2010 cohort, the National Student Clearinghouse began including completion of certificates in the "graduated" portion of the success rates. In previous cohorts, only completion of bachelor's or associate's degrees were included.
